

PRODUCT INFORMATION SHEET

TAUBER 4-way stretch protective jacket

Product description

TAUBER professional protective sweatshirt is made of the highest quality materials. In addition to high durability, it also provides great comfort of use. During the production of the sweatshirt, special attention was paid to the functionality and safety of the clothing. 4-way stretch standard increases the elasticity of the sweatshirt, which makes it suitable for many types of work, without restricting the user's movements. In addition, reflective details ensure safety when working after dark. A large number of capacious pockets influences on the usability of the product. The fabric offers an excellent combination of elasticity, ventilation and comfort. CORDURA material, which significantly reinforces TAUBER sweatshirt in sensitive elements, is used on the shoulders. Underarm ventilation with the possibility of opening the zipper during warmer days is added to the sweatshirt. The sweatshirt is available in a fashionable dark grey colour with blue elements, and a wide range of sizes (from S to 3XL). It is designed for professionals. Perfect for production, construction, transport workers and car mechanics. It is ideal for service, installation and technical works.

Characteristics
