

# Remote dimmer 1000 W

0 036 71

## Technical data

Voltage	100 - 240 V~
Frequency	50 - 60 Hz
	2 x 1.5 mm <sup>2</sup> or 1 x 2.5 mm <sup>2</sup>
Capacity	6 modules
Conforms to	IEC 60669-2-1
	0° C to + 45° C

 Do not mix loads of type ③ and ④.

	①	②	③	④
				
110 V~	500 W	500 W	500 VA	500 VA
230 V~	1000 W	1000 W	1000 VA	1000 VA

- ① Incandescent lamp
  - ② Halogen lamp
  - ③ ELV Halogen lamp with ferromagnetic or electronic transformer
  - ④ ELV halogen lamp with electronic transformer
- (\*) Only use transformers designed for use with an electronic switch.

## Description

 Indicates the type of load

If the type of lighting load is changed, press simultaneously for 10 secs on the ON, O, +, -, buttons on the front. The colour of the LED (green/orange) has no bearing on the correct functioning of the product.

## Safety instructions

This product should be installed preferably by a qualified electrician.

Incorrect installation and use can entail risk of electric shock or fire.

Before carrying out the installation, read the instructions and take account of the product's specific mounting location.

Do not open up the device. All Legrand products must be opened and repaired only by personnel trained and approved by Legrand.

Any unauthorised opening or repair completely cancels all liabilities and the rights to replacement and guarantees.

Only use Legrand brand accessories.

### Protection by electronic device:

- In the event of an overload and with temperatures higher than the max. operating temp, the product automatically regulates the power by reducing the lighting.
- In the event of a short-circuit or a very high overload, the remote dimmer switches off. When the fault has been rectified, the product returns to normal functioning.

## Factory set configuration

When first powering up, pressing on the ON or OFF keys controls all the remote dimmers cabled into the bus.

This facility is provided in order to check the correct functioning of all the lights.

A double press on the LEARN<sup>(1)</sup> key cancels this general control function.

<sup>(1)</sup>Programming or learning key.

## Cabling

### Important :

- Ferromagnetic transformers must be charged to over 60% of their nominal power.
- Take into account the efficiency of the ferromagnetic transformers when calculating the acceptable power (example: transformer for a 50 W lamp with an efficiency return of 0.78  $\Rightarrow$  actual power consumed by the transformer = 64 VA).

## Cabling with single push-button

## Local functioning

Action

L

Short press on the ON/+ key

Short press on the OFF/- key

Long press on the ON/+ key

Long press on the OFF/- key

## Local functioning *(continued)*

Action

L

Short press on the 1/+ key

Short press on the 2/- key

Long press on the 1/+ key

Long press on the 2/- key

## Customising the light level of keys 1 and 2 x

### Action

From key 1/+

Adjustment of the light level required:

- By a long press on the ON/+ key
- By a long press on the OFF/- key

Saving:

- By pressing simultaneously on keys 1/+ and ON/+
- The level of key 1/+ is then recorded

### L

From key 2/-

Adjustment of the required light level:

- By a long press on the ON/+ key
- By a long press on the OFF/- key

Saving:

- By pressing simultaneously on keys 2/- and OFF/-
- The level of key 2/- is then saved

## Customising the light level of keys 1 and 2 x (continued)

**Action**

**L**

### Level memory

To activate level memory:  
simultaneous long press on buttons OFF/- and 1/+

After switch-off,  
the load will light up  
again at the previous  
level

To deactivate level memory:  
simultaneous long press on buttons ON/+ and 2/-

After switch-off,  
the load will light up  
again at the maximum  
level

## Push-button operation

Action	L	Action	L
 Short press 		Long press 	
Short press 		Long press 	

## Push-button operation (continued)

L	Action	L	Action	L
	 Short press 		Short press 	
	Long press 	    		

## Resetting factory configuration

### Action

### Indicator light status

#### Remote dimmer transmitter:

Press the LEARN key 

Press the LEARN key   
and keep it pressed for 10 seconds

## Legend

The indicator light goes out

The indicator light blinks slowly

The indicator light blinks rapidly

The indicator light flashes
