Flush mounted actuator with 2 independent relays

BTICINO'S ENVIRONMENTAL COMMITMENTS

• Incorporate environmental management into our industrial sites
Of all Legrand sites worldwide, over 85% are ISO 14001-certified (sites belonging to the Group for more than five years).

• Offer our customers environmentally friendly solutions
Develop innovative solutions to help our customers design more energy efficient, better managed and more environmentally friendly installations.

• Involve the environment in product design and provide informations in compliance with ISO 14025
Reduce the environmental impact of products over their whole life cycle.
Provide our customers with all relevant information (composition, consumption, end of life, etc.).

REFERENCE PRODUCT

Function	Allow, for 10 years, the control of single, double or mixed loads, with 2 independent relays and neutral; it can be configured also to manage a remote actuator and it can be completed with two single key covers or one 2 modules key cover.
Reference Product		BT-LN4672M2
	Flush mounted actuator with 2 indipendent relays and neutral - 2 modules - LivingLight series

PRODUCTS CONCERNED

The environmental data is representative of the following products:

BT-LN4672M2
BT-H4672M2, BT-AM5852M2

CONSTITUENT MATERIALS

This Reference Product contains no substances prohibited by the regulations applicable at the time of its introduction to the market. It respects the restrictions on use of hazardous substances as defined in the RoHS directive 2011/65/EU.

Total weight of Reference Product	**75 g** (all packaging included)

Plastics as % of weight		**Metals as % of weight**		**Other as % of weight**	
Polycarbonate	25,2 %	Copper alloys	1,7 %	Electronic cards	32,3 %
Polyamide	1,8 %	Steel	0,8 %	**Packaging as % of weight**	
				Wood	21,5 %
				Paper / cardboard	14,1 %
				PET	1,5 %
				Polyethylene	1,1 %
Total plastics	**27,0 %**	**Total metals**	**2,5 %**	**Total other and packaging**	**70,5 %**

Estimated recycled material content: 13 % by mass.

MANUFACTURE

This Reference Product comes from sites that have received ISO14001 certification.

DISTRIBUTION

Products are distributed from logistics centres located with a view to optimize transport efficiency. The Reference Product is therefore transported over an average distance of 780 km by road from our warehouse to the local point of distribution into the European market.

Packaging is compliant with european directive 2004/12/EU concerning packaging and packaging waste. At their end of life, its recyclability rate is 90 % (in % of packaging weight).

INSTALLATION

For the installation of the product we consider that the customer has to manage two separated loads and so he uses two single key covers discarding the other couple of single key covers and both the two modules key covers, all provided with the article.

USE

Under normal conditions of use, this product requires no servicing, no maintenance or additional products.

END OF LIFE

The product end-of-life factors are taken into account during the design phase. Dismantling and sorting of components or materials is made as easy as possible with a view to recycling or failing that, another form of reuse.

• Recyclability rate:
Calculated using the method described in technical report IEC/TR 62635, the recyclability rate of the product is estimated at 82 %. This value is based on data collected from a technological channel operating on an industrial basis. It does not pre-validate the effective use of this channel for the end of life of this product.

Separated into:

- plastic materials (excluding packaging) : 26 %
- metal materials (excluding packaging) : 3 %
- other materials (excluding packaging) : 19 %
- packaging (all types of materials) : 34 %

ENVIRONMENTAL IMPACTS

The evaluation of environmental impacts examines the stages of the Reference Product life cycle: manufacturing, distribution, installation, use and end-of-life. It is representative from products marketed and used in Europe, in compliance with the local current standards.

For each phase, the following modelling elements were taken in account:

Manufacture	Materials and components of the product, all transport for the manufacturing, the packaging and the waste generated by the manufacturing.
Distribution	Transport between the last Group distribution centre and an average delivery point in the sales area.
Installation	The end of life of the packaging, one couple of single key covers and both the two modules key covers, all provided with the article.
Use	• Product category: active product. • Use scenario: ten-year working life. Considered the heaviest scenario with 2 lighting loads. Stand-by mode power: 0,2 W for 70 % of the time; active mode power: 0,6 W for 30 % of the time. This modelling duration does not constitute a minimum durability requirement. • Energy model: Electricity Mix, Europe 27 - 2002.
End of life	The default end of life scenario maximizing the impacts.
Software and database used	EIME V5 and its database «CODDE-2015-04»
