

# Phase coupler

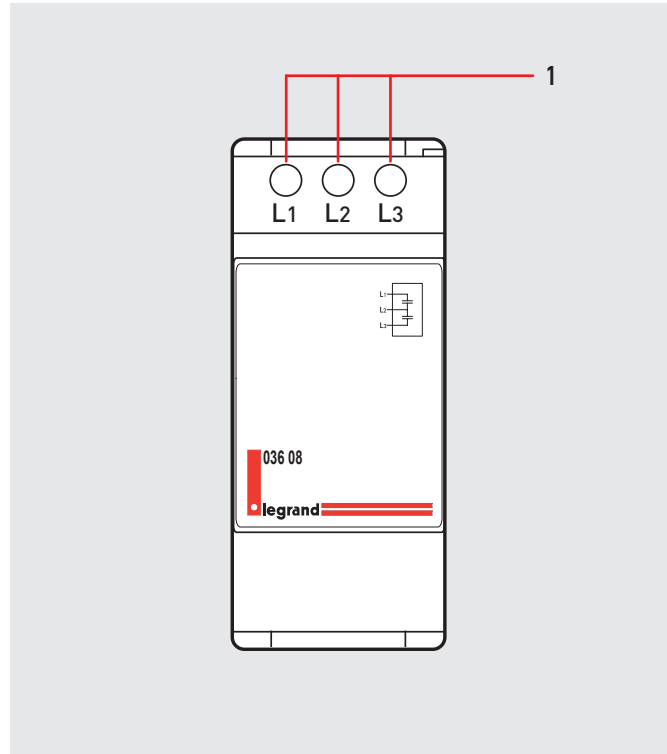

036 08

### Description

The phase coupler ensures that signals pass through the different phases (three phase 400VA). It is mounted in the consumer unit downstream of input filters (036 09)

### Technical data

Voltage: 400V  
 Frequency range: 95 – 148.5 kHz  
 Attenuation (132.5 kHz): - 0 dB min.  
 Impedance (132.5 kHz): 0.25 max.  
 Storage and operating temperatures: 5 – 45 °C

### Dimensional data

2 DIN modules

### Legend

1. Three-phase line IN

### Wiring diagram
