

Warning plates

TQM-TTM-TUM-PRP/7/G

Made of self-extinguishing material, they are suitable to ensure operating safety on terminal blocks connected to live circuits.

Cabur warning plates bear signals and warning writings that can be fitted on top of the blocks by means of nylon screws. They are available in several models with various sizes depending on the types of terminal blocks.

Warning plates can cover three or four poles; in some cases the three pole plate is obtained from the four pole version by removing a pre-cut part.

For CBC. 2-4-6-10 terminal blocks screwless PRP/7/G is supplied, to be inserted in the cross connection groove.
