

## PRODUCT INFORMATION SHEET

### Impact socket set for 1/2" alloy wheels, 12 pcs.

#### Product description

A set of short and long designed for various drivers, including impact wrenches. The set is versatile and finds a great variety of applications, including tightening and removal of wheel bolts for light alloy rims. The colour coding of the long sockets makes finding the right size easy. Made from chrome-molybdenum steel, this tool is designed for the highest impact loads. The material is deformation resistant, impact resistant and durable with a low weight. The design helps working in tight areas with a high tightening torque. The cold forging process has made the tool stronger, harder, and less plastic. The colour coding of the long sockets helps with quick identification of sizes.

#### Characteristics

No. of sockets: 12 pcs. Bit size: - Short form: 10, 11, 13, 15, 17, 19, 21, 22, 24 mm; - Long form: 17, 19, 21 mm.  
Long socket length: 150 mm. Drive size: 1/2". Material: CrMo steel.
