Device installation trunking Without base perforation suitable for direct wall mounting or mounting on panels. Over-lengths up to 6,000 mm for trunking bases and covers as well as other RAL colours can be provided on request. The visible surfaces of the device installation trunking are laminated.
The cover must be ordered separately. We recommend the use of the duct clamp.
Note:
For anodised device installation trunking and fittings made from aluminium, light colour differences caused by tolerance based on the material and process conditions, cannot be avoided (according to DIN 17 611). Alternatively, we recommend powder coating in the colour RAL 9006 (white aluminium).
