

USB COB SMD headlamp, 10 functions

Product description

A headlamp with 10 lighting modes, making it adaptable to various needs and conditions.

The COB lamp provides soft light with LED diodes placed on a flexible strap, allowing for illuminating a wide area. This is useful for observing a large field of terrain without unnecessary head movements. It can emit light in three colors: white, yellow, and red.

The SMD reflector provides focused and intense illumination of specific objects.

The maximum light output of the headlamp is 600 lm, depending on the chosen mode.

The lamp has 10 lighting modes, with corresponding working times:

1. ■ White COB light - 400 lm, 1.5-2 h,
2. ■ White COB light - 155 lm, 3-4 h,
3. ■ Yellow COB light - 300 lm, 1.5-2 h,
4. ■ Yellow COB light - 120 lm, 3-4 h,
5. ■ Red COB light - 22 lm, 6-7 h,
6. ■ Red COB light stroboskop - 22 lm, 6-7 h,
7. ■ SMD diode 100 lm, 2-3 h,
8. ■ SMD diode 50 lm, 6-7 h,
9. ■ White and yellow COB light - 600 lm, 1-1.5 h, BOOST
10. ■ Strobe light 600 lm, 2-3 h. BOOST

The strobe mode is useful as a warning light.

A hand gesture-activated motion sensor is excellent for turning the lamp on or off without having to find and press a switch. Simply move your hand near the sensor to turn the light on or off. This is particularly important when your hands are full or dirty and you do not want to search for the switch.

The built-in 1200 mAh battery provides up to 7 hours of operation. It can be charged with the included USB-C cable in 3 hours.

The silicone material on the headband ensures it does not slip off the head or hat.

Characteristics

- Motion sensor;
- 10 lighting modes;
- Lighting - COB and SMD LED diodes;
- Light strength - up to 600 lm;
- Operating time - up to 7 h;
- Charging time - 3 h;
- Charging method - USB-C cable;
- Battery - 3.7V 1200 mAh Li-Ion;
- Material - silicone - ABS
