

COB XPG USB Headlamp, 6 Functions

Product description

A headlamp with 6 lighting modes, making it adaptable to various needs and conditions.

The COB lamp provides soft light with LED diodes placed on a strap in the housing, allowing for illuminating a wide area. This is useful for observing a large field of terrain without unnecessary head movements.

The XPG reflector provides focused and intense illumination of specific objects.

The maximum light output is 380 lm, depending on the chosen mode.

The lamp has 6 lighting modes, with corresponding working times:

COB 50%, 130 lm, 6-7 h,

COB 100%, 260 lm, 3-4 h,

XPG 50%, 120 lm, 6-7 h,

XPG 100%, 240 lm, 3-4 h,

COB and XPG, 380 lm, 2-2.5 h,

COB and XPG strobe, 380 lm, 6-7 h

The strobe mode is useful as a warning light.

A hand gesture-activated motion sensor is excellent for turning the lamp on or off without having to find and press a switch. Simply move your hand near the sensor to turn the light on or off. This is particularly important when your hands are full or dirty and you do not want to search for the switch. The sensor can be activated by a button depending on current needs.

The built-in 1200 mAh battery provides up to 7 hours of operation. It can be charged with the included USB-C cable in 3 hours.

Characteristics

- Motion sensor with a switch;
- 6 lighting modes;
- Lighting - COB and XPG LED diodes;
- Light output – up to 380 lm;
- Operating time – up to 7 h;
- Charging time – 3 h;
- Charging method – USB-C cable;
- Battery - 3.7V 1200 mAh Li-Ion;
- Material – ABS.
