

PRODUCT INFORMATION SHEET

Worklight 500 lm

Product description

Compact, portable work lighting, which is characterised by very good quality of emitted light and high resistance to damage and durability. It is suitable for work in the most difficult conditions - construction, finishing, renovation, workshops and outdoors. It has powerful and energy-saving LEDs that shine at a distance of up to 57 m. It has 3 light intensity modes. The lamp is powered by an efficient battery, ensuring continuous operation for up to 10 hours. A solid housing with a high impact protection rating - IK07 guarantees full resistance to impact energy of 2 J, which is equivalent to an impact of a 500 g object from a height of 40 cm. Additionally, the housing is resistant to splashing water in IPX4 rating, which allows it to be safely used in light rain. It can work in a wide range of temperatures, outdoors in winter and in hot weather ranging from -20°C to +40°C. The handle working with a 180° tilt range allows the light to be directed in selected direction. A strong magnet makes it possible to mount the floodlight by attaching it to a metal element, such as an engine cover to free up hands for work. The charging indicator makes it possible to check the remaining battery power.

Characteristics

Max. luminous flux - 500 lm;

Three operating modes - power/operating time/beam length:

1. 500lm/ 3H/ 57m;
2. 170 lm/ 8 H/ 31 m;
3. 150 lm/ 10 H/ 19 m;

Additional function - dimming;

Impact protection class - IK07 (equivalent to an impact of a 500 g object from a height of 40 cm);

Waterproof class - IPX4 - protection against splashing water

Power supply - 3.7 V, 2000 mAh battery;

Max. working time - 10 H;

Max. charging time - 3 H;

Head tilt adjustment - 180°;

Mounting - magnet;

Charging port - USB-C.
