

PRODUCT INFORMATION SHEET

Long screwdriver PH2x450

Product description

This long cross-head screwdriver, 45 centimeters in length, is an excellent tool for working with screws located in hard-to-reach and distant places. It is made of durable, deformation-resistant chrome-vanadium alloy steel with a hardened tip. Its magnetization facilitates and speeds up work with screws, especially those placed in areas inaccessible to fingers. The ergonomic handle design ensures comfort in use with minimal effort. The anti-slip surface facilitates precise work and allows for full force transfer to the screw. The special design allows working with stubborn nuts and screws by the possibility of hammering or increasing the unscrewing force using a flat wrench.

Characteristics

- Tip length - 450 mm;
- Tip type - PH2, cross-head;
- Tip features - hardened and magnetized;
- Material - CrV;
- Design - possibility of hammering and using a flat wrench;
- Handle - ERGO.
