

DUO 8A 18V Charger

Product description

An efficient charger with two ports for 18V batteries, designed for users who need to charge several batteries at the same time. When two batteries are connected, each battery is charged with 4 A, which ensures fast and efficient replenishment. The charger will charge two 2 Ah batteries in just about 30 minutes.

An advanced electronic module continuously monitors the voltage and temperature of the batteries, optimizing the charging process and extending their lifespan. Built-in protections protect against overheating and current short-circuits, increasing the safety of use. Cell charge level control ensures maximum efficiency and battery life. LEDs inform about the status of the batteries and the progress of the charging process. The power saving mode starts automatically when the batteries are not being charged, which minimizes power consumption. In addition, the charger is equipped with a fan that effectively cools the device during intensive work.

Features:

- Voltage: 18V
- Number of ports: 2.
- Charging Current: 2×4A
- Charging time of the 2 Ah battery: 30 min (80%).
- 4 Ah battery charging time: 60 min (80%).
- Charging time of the 6 Ah battery: 90 min (80%).
- Protections: overheating, short circuit, overcharging.
- LED charging status indicators.
- Built-in cooling fan.
- Power saving mode.

Benefits:

- Charge two batteries at the same time.
- Fast energy replenishment – in as little as 30 minutes with a 2 Ah battery.
- High security thanks to extensive security.
- Extended battery life.
- Full process control thanks to LED indicators.
- Comfortable use and stable operation thanks to active cooling.

The 2×4A dual charger is ideal for professionals and DIYers who use multiple batteries. Speed, safety and simultaneous charging make work more efficient and work breaks shorter.

Characteristics

- Efficient dual-channel charger for 18 V batteries – allows you to charge two batteries at the same time.
- When two batteries are connected, each is charged with a power of 4 A.
- Fast charging – two 2 Ah batteries reach 80% in approx. 30 minutes.
- An advanced electronic module monitors voltage and temperature, increasing battery performance and durability.
- Overheating protection extends the life of the batteries.
- Short-circuit protection improves the safety of the charging process.
- The cell level control system ensures longer battery life.
- LED indicators indicate the status of the batteries and the progress of charging.
- Power Saving Mode minimizes power consumption when batteries are not being charged.
- A built-in fan cools the charger during operation.
