

SHINE BRIGHTER WITH LEDVANCE LED TUBES

POWERFUL, ROBUST, EFFICIENT AND VERSATILE: THE NEW LED TUBE PORTFOLIO HAS IT ALL

SWITCHING HAS NEVER BEEN EASIER

The LEDVANCE LED tubes range has become even more diverse. Especially the new HEAVY DUTY TUBES, which meet even the most demanding industrial applications, make switching to LED technology even easier. There are LED TUBE T8 EM HIGH TEMPERATURE which are suitable for ambient temperatures up to 80° C, LED TUBE T8 EM HIGHBAY that have extremely high illuminance levels and LED TUBE T8 EM ULTRA OUTPUT 6kV that come with high surge protection. And then there are LED TUBE T8 EM CHIP CONTROL for use in yellow rooms which have a special filter tube that minimises the light component below 500 nm.

INCREDIBLY EFFICIENT WITH UP TO 210 LM/W

LEDVANCE has also significantly expanded its range of energy efficiency class A LED lamps. When it comes to LED tubes, the new LED TUBE T8 EM boasts an efficiency of up to 210 lm/W and an average life of up to 100 000 hours. Compared to a standard LED tube, this can save up to 36 % on energy and costs, and up to 78 % compared to a conventional fluorescent lamp. New products with energy efficiency class A can also be found as LED lamps in classic shapes and as LED reflector lamps.

LEDVANCE has revised and significantly expanded its LED lamp portfolio. True to the “Power through light” motto, it offers intelligent, sustainable and above all economical solutions for almost any requirement and need on site. The range has never been bigger and switching has never been easier, which is especially true for LEDVANCE LED tubes. Lighting professionals can also benefit from the company’s support and one-stop-shop concept.

SWITCHING MADE EASY DESPITE DALI

Simply keep the luminaire and just change the driver and lamp. The LED TUBE EXTERNAL SYSTEM is a dimmable, DALI-2-compatible solution suitable for emergency lighting for upgrading conventional T5 or T8 lighting systems to LED where the luminaire can’t be replaced. The extended LEDVANCE LED lamp portfolio now also offers LED TUBE T8 EXTERNAL in 600 mm length and LED TUBE T5 EXTERNAL in 549 mm, 849 mm and 1149 mm in addition to the familiar longer versions. This means the system LEDVANCE LED TUBES and LED DRIVER EXTERNAL can now be used in many other applications.
