

# JUST WIRE AND BE HAPPY

Are you looking for efficient, intelligent and environmentally friendly lighting? One thing is clear: You can only achieve maximum energy savings by using lighting control – after switching to LED. Lighting control adds another 50 % of decrease in energy consumption. See for yourself and share this convincing argument with your customers.

**TOTAL SAVINGS POTENTIAL: 80 %\***

\* Based on facts from licht.de and data from LEDVANCE VIVARES dashboard monitoring of energy consumption.

## DALI-2 MCUS – FIRST TIME IN LEDVANCE BRAND

- 1 Plug & play:** ready to use. Just wire and be happy
- 2 Pre-programmed functions for manual room lighting:** ON/OFF, DIM, TW, MEMORY. No app, software or registration required
- 3 High quality glass controllers** with touch display
- 4 Exchangeable front cover** thanks to broad compatibility with most popular lighting frames in the market, e. g. Gira, Jung, Busch-Jäger
- 5 Surface mount frame** accessory for walls where flush-mount installation is not possible
