

SAME SHAPE AS ALWAYS, MORE EFFICIENT THAN EVER

Extremely high efficiency
of up to 190 lm/W

THE NEW LEDVANCE NAV LED FILAMENT

The direct future-proof replacement for mercury vapor lamps. The new LEDVANCE NAV LED FILAMENT lamps for street and area lighting save up to 63 % energy. They can be operated on CCG for NAV or mains voltage and offer instant 100 % light without any warm-up time. Their tubular full-glass bulb with its 360° light distribution is hardly any different from that of traditional NAV lamps so existing luminaires and reflectors can continue to be used.

- For streets, areas, pedestrian zones and parks
- Suitable for operation with conventional control gear (CCG) for NAV or 230V mains voltage
- Very high efficiency of up to 190 lm/W
- Up to 63 % lower energy consumption than traditional NAV lamp
- Available in 4,000 K and 2,700 K light colors
- Very low weight
- Protection class: IP65
