

SAME SHAPE AS ALWAYS, MORE EFFICIENT THAN EVER

Extremely high efficiency
of up to 190 lm/W

THE NEW LEDVANCE NAV LED FILAMENT FOR STREETS AND SQUARES

The direct future-proof replacement for mercury vapor lamps. The new LEDVANCE NAV LED FILAMENT lamps operate on CCG for NAV or mains voltage and save up to 63 % energy thanks to advanced LED technology. Other benefits: 100 % light without any warm-up time, 360° beam angle and two available light colors. Their tubular full-glass bulb hardly differs from that of traditional NAV lamps and will fit in any existing luminaire.
