

ADVERTORIAL

# SWITCHING IS EASIER THAN EVER WITH OUR NEW 2-IN-1 LED TUBE AND OUR BROAD LED TUBE RANGE

LEDVANCE is the first supplier on the market to offer T8 tubes with **MULTI LUMEN** functionality. There's a choice of two luminous flux levels before installation which translates into flexible use, reduced warehousing and simple planning. What's more, the lamps come with a longer lifetime and a guarantee of up to seven years.

## HIGHEST ENERGY SAVINGS OR HIGHEST PERFORMANCE?

It now won't have to be either one or the other. Using a toggle on the lamp head of the LED TUBE T8 EM MULTI LUMEN, installers can switch between two luminous flux levels before installation. This allows them to always have the right product to hand and save time during planning and implementation, while wholesalers benefit from reduced storage costs and lower consultation time and costs – all while maintaining the same product choice.

## BROAD LED TUBE RANGE

LEDVANCE offers a wide LED tube range beyond LED TUBE T8 EM MULTI LUMEN which makes switching to LED super easy – whether it's a straight retrofit or an upgrade. For lighting professionals this means that they will always have the right solution for every challenge.

## GUARANTEED QUALITY

LED TUBE T8 EM MULTI LUMEN are available as PERFORMANCE or SUPERIOR CLASS models with a length of 1.2 and 1.5 metres. They offer a lifetime of up to 100 000 hours and an impressive lamp guarantee of up to seven years.
