

ARMAC BATTERY  
PACK

FOR RACK UPS R/6000I/PF1/DF &  
R/10000I/PF1/DF

The optional Battery Pack module has been specifically designed to work with compatible RACK-type UPS systems. When connected to a UPS, the product provides extended battery backup time for connected loads. Use only with UPS systems that have the same total battery voltage.

SPECYFIKACJA PRODUKTU:

|                              |                    |
|------------------------------|--------------------|
| Type of casing               | Rack               |
| Batterypack battery quantity | 20                 |
| Connectors                   | Anderson           |
| Battery type                 | Lead acid VRLA AGM |
| Battery string voltage       | 240 V              |
| Required battery voltage     | 20x 12V            |
| Weatherproof rating          | IP20               |
| ICT height                   | 3 U                |
| Dimensions                   | 650 x 440 x 130 mm |
| Weight                       | 63 kg              |
