SNMP MODULE BOX FOR UPS POWERWALKER VFI C/CG PF1/ EVS/RMG VI CW

Catalog number: 10131022

Product description

Model: SNMP Box 2 SKU: 10131022 The PowerWalker SNMP Box 2 is a powerful and intelligent communication module designed for centralized monitoring and management of multiple UPS systems across different locations. With its integrated web access and SNMP protocol support, it enables real-time remote control, status monitoring, and configuration – even when devices are installed on different floors or in separate buildings. Thanks to seamless integration with ViewPower Pro, dynamic graphical dashboards and historical data logs can be viewed and analyzed centrally. The device also supports automatic alert notifications via email, messenger, broadcast, audible alarm, and SNMP traps, helping you respond quickly to power events. One of the key features is the easy firmware upgrade functionality: system administrators can download the latest firmware and apply updates to all connected devices with a single click. The SNMP Box 2 communicates with UPS units via RS232 cable and is

powered conveniently through a USB connection. Product features: -) Remote monitoring and control of multiple UPS units via RJ45 network connection -) Real-time graphical display of UPS status and performance -) Alert notifications through email, mobile messenger, alarm, and SNMP traps -) Centralized data logging and historical analysis -) Simple one-click firmware upgrades -) Secure access with password protection and remote management -) Compatible with ViewPower Pro software for enhanced functionality
